**Summary of Existing Regulations**

The existing 2001 California Building Code is Part 2 of CCR, Title 24 and incorporates, by adoption by CBSC, the 1997 Uniform Building Code of the International Conference of Building Officials. This code provides minimum building standards to safeguard public welfare for local jurisdictions within the state of California and for state owned buildings and buildings constructed by the University of California and California State Universities. It contains amendments in Chapter 16A for applications under the authority of the Division of State Architect for seismic retrofit of existing state buildings. It contains references to other codes, such as the fire code, mechanical code, and plumbing code that are adopted for use in California.

In February of 2006, the International Code Council (ICC) published the 2006 edition of the International Building Code (IBC). It contains references to other codes, such as the International Mechanical Code, International Plumbing Code, and International Fuel Gas Code, that California does not adopt.

**Summary of Effect**

CBSC is mandated to adopt the most current editions of the model codes, which are the 2006 IBC, 2006 International Existing Building Code, 2006 Uniform Mechanical Code, 2006 Uniform Plumbing Code, and 2005 National Electrical Code. This proposed action by CBSC will make effective the 2006 IBC for occupancies pursuant to H & SC

§18934.5, 180 days after publication of the next triennial edition of the California Building Code. This proposed action will also:

- Repeal the 2001 CBC, including CBSC amendments thereto;
- Relocate from the 2001 CBC, and propose new, administrative and scoping provisions for occupancies under the authority of state agencies as Chapter 1, General Code Provisions, and rename and relocate IBC Chapter 1 Administration to Appendix Chapter 1;
- Relocate from the 2001 CBC provisions for campus lighting and private swimming pools which are not addressed by the IBC;
- Correlate references to model codes that California does not adopt with those that California proposes for adoption; and
- With the Division of State Architect, relocate from the 2001 CBC, and propose new, seismic retrofit standards for existing state buildings regulated by CBSC.

#### Comparable Federal Statute or Regulations

There are no comparable federal statutes or regulations related to the proposed action by CBSC.

#### Policy Statement Overview

The proposed adoption of the 2006 IBC makes applicable to state-owned building projects and projects permitted by local agencies the most current edition of the IBC by reference through CCR, Title 24, Part 2. It defines administrative regulations for state agencies, and makes available by adoption by local jurisdictions the administrative provisions of the IBC in Appendix Chapter 1. It carries forward CBSC campus lighting and private swimming pool provisions which are not addressed in the IBC. It correlates model code references within the 2006 IBC, which will eliminate conflict and provide internal consistency among model codes adopted by reference in CCR Title 24. It co-adopts with the Division of State Architect seismic retrofit standards for existing state-owned buildings not covered in the IBC.

#### **OTHER MATTERS PRESCRIBED BY STATUTE APPLICABLE TO THE AGENCY OR TO ANY SPECIFIC REGULATION OR CLASS OF REGULATIONS**

CBSC has determined that there are no other matters prescribed by statute applicable to the agency or to any specific regulation or class of regulations.

#### **MANDATE ON LOCAL AGENCIES OR SCHOOL DISTRICTS**

CBSC has determined that the proposed regulatory action would impose a mandate on local agencies or school districts. However, the mandate does not require reimbursement pursuant to Part 7 (commencing with §17500) of Division 4, Government Code. H & SC §18928 requires CBSC to adopt the most current edition of the model codes.
